

## Good afternoon: warm up in notebooks

What is the most specific name for the quadrilateral formed by  $A(-3,3)$ ,  $B(1,4)$ ,  $C(0,0)$ , and  $D(-4,-1)$ ? Justify your answer.

reminders

- tutoring tmrw
- test next class
- grades finalized  
noon 12/19

# Visibly Random Grouping

## Last Q2 assessment:

GPE-B4a: Classifying a Quad on Coord. plane

SRT-B5b: Triangle Congruence Proofs, DIY

CO-C11a: Parallelogram Properties

CO-C11b: Rectangle/Rhombus/Square Properties

## Practice Assessment

- work on it privately, like a real test, for 15 mins
- will trade papers with a partner, 'grade' their work

**#6: add: "Find the length of OB"**

HW

Finish practice test, check solutions + study vids  
assessment is next class

Q2 grades finalized noon Tuesday 12/19
