

More Transformation Practice

Graph the image based on the given pre-image and transformation. Label using primes.

1) reflection across $y = x$

2) rotation 90° counterclockwise about the origin

3) rotation 90° counterclockwise about the origin

4) reflection across the y-axis

5) translation: $(x, y) \rightarrow (x - 1, y + 1)$

6) translation: $(x, y) \rightarrow (x + 2, y - 2)$

First, identify whether each shows a translation, reflection, or rotation. If a translation, write the rule in arrow notation. If a reflection, give the line of reflection. If a rotation, give the degree and direction.
